

“ I bring structure to complex business and technology environments and help teams deliver practical, measurable change.

SIGNATURE PROJECT SNAPSHOTS

VOLUNTEERING GOLD COAST

Transport & operational transformation

- Current / future-state analysis and workflow redesign
- Voucher processing reduced from ~3 days to 1 day
- Trips, CareMaster/TMA, DEX, reporting and SharePoint
- Integrations, UAT, training and BAU transition

PERSISTENT

Application modernization

- Project Lead and Scrum Master
- Backlog, sprint planning, reviews and retrospectives
- Requirements, user stories and acceptance criteria
- Stakeholder coordination, blockers and dependencies

Mphasis

Infrastructure, security & ITIL delivery

- Cloud, infrastructure and identity-access exposure
- Incident, problem and change management
- Security monitoring, governance and reporting
- Cross-functional delivery and operational handover

Business transformation

SANGEETA JPV

BUSINESS TRANSFORMATION | BUSINESS SYSTEMS ANALYSIS | TECHNOLOGY DELIVERY

Gold Coast, QLD | 0416 108 037 | sangi.capri@gmail.com

Executive Profile

Senior Business Systems Analyst and technology delivery professional with 13+ years across enterprise systems, infrastructure, cloud, security, Agile delivery and business transformation. Works comfortably between operational users, technical teams, vendors and leaders—clarifying requirements, improving workflows and helping solutions move through testing, implementation and BAU handover.

Professional approach: Organised • Clear communicator • Reliable follow-through • Adapts quickly • Works independently • Connects business and technology

CORE CAPABILITIES

Business Systems Analysis	Operational Transformation
• Requirements elicitation • Current / future-state analysis • User stories and acceptance criteria • Functional and non-functional requirements • UAT planning and support	• Workflow redesign • Process and service improvement • Operational readiness • Change adoption • BAU transition and handover
Data, Reporting & Automation	Technology Delivery
• Power BI, SQL and Power Query • Excel / VBA • Data validation and extracts • Dashboards and reporting • Workflow automation	• Agile and Scrum delivery • Cloud and infrastructure • ITIL / ITSM • Stakeholder and vendor coordination • Delivery governance and RAID

TOOLS & PLATFORMS

Business Analysis & Collaboration

Visio, Draw.io, Gliffy, Miro, Mural, Jira, Azure DevOps, Confluence, SharePoint and Microsoft 365.

Cloud, Infrastructure & Security

Azure, AWS, VMware vSphere, SCCM, SCOM, Windows Server, IAM, PAM, MFA, SSO, Splunk and FireEye.

Methods & Frameworks

Agile, Scrum, Kanban, ITIL v3, BABOK-aligned analysis, Lean Six Sigma, design thinking, Incident, Problem and Change management, 5 Whys and SWOT, Business continuity and disaster recovery.

Data, Reporting & Automation

Power BI, DAX, Power Query, SQL, SQL Server, SSMS, Excel, VBA, PowerShell, Power Automate and dashboards.

Enterprise Platforms & Integration

Trips, CareMaster/TMA, DEX, Deputy, Employment Hero, 13CABS, Cabcharge, APIs and email-to-SMS workflows.

Delivery Practices

Requirements workshops, UAT, RAID, backlog refinement, governance reporting, stakeholder management and vendor coordination.

CERTIFICATIONS

- Certified ScrumMaster (CSM) — Scrum Alliance
- Scrum Fundamentals Certified (SFC) — ScrumStudy
- Agile Meets Design Thinking
- Digital Garage Certificate — Google
- Google Project Management Certificate — Coursera
- Excel Skills for Business: Advanced — Coursera
- Computech (IT / Technical Training Certificate)
- Red Team Factory (Foundational Cyber / Security Awareness Training)

EDUCATION

- Advanced Diploma of Leadership & Management
- Diploma of Leadership & Management
- B.Sc. Physics

PROFESSIONAL EXPERIENCE

Business Analyst / Systems & Transformation

Volunteering Gold Coast | Queensland, Australia | Mar 2024 — Jun 2026

- Led current-state and future-state analysis across transport, volunteering and service-delivery systems, identifying process gaps, business rules, data dependencies and practical improvement opportunities.
- Elicited and documented functional, non-functional and information requirements; translated operational needs into process maps, user stories, acceptance criteria and UAT activities.
- Redesigned the transport voucher workflow and reduced processing time from approximately three days to one day through workflow simplification, stronger data validation and clearer operational hand-offs.
- Supported Trips, CareMaster/TMA and DEX-connected initiatives, including data imports, data extracts, reporting improvements, billing and payer processes, validation and exception handling.
- Analysed integration and workflow opportunities involving 13CABS, Cabcharge and SMS notifications, working with vendors and internal stakeholders to assess APIs, feasibility and dependencies.
- Improved reporting, documentation and operational readiness through Power BI, SQL, Excel, SharePoint remediation, training materials, UAT coordination and BAU transition.
- Partnered with executives, operational teams, vendors and end users to clarify priorities, manage risks and support practical adoption.

Project Lead / Scrum Master

Persistent Systems | Bangalore, India | Jun 2022 — Jul 2023

- Led Agile delivery activities for an application Modernisation initiative involving redevelopment of a legacy Ruby on Rails platform.
- Facilitated sprint planning, daily stand-ups, backlog refinement, reviews and retrospectives; managed blockers, dependencies, risks and delivery cadence.
- Coordinated business and technical stakeholders, clarified requirements and translated feedback into backlog items, user stories and acceptance criteria.
- Provided delivery structure in an evolving program by tracking priorities, decisions, scope and progress across multidisciplinary teams using Agile and Scrum practices.

Cloud & Infrastructure Consultant (Freelance)

Independent Consulting | Remote | Nov 2020 — May 2022

- Analysed cloud-migration readiness, infrastructure requirements, dependencies, integrations and security considerations across Azure and AWS environments.
- Documented functional and non-functional requirements and produced practical recommendations to support business and technical decision-making.
- Automated recurring administrative activities using PowerShell and VBA and used SQL, Power BI and Excel for analysis, reporting and operational visibility.

Lead Infrastructure Engineer

Mphasis Limited | India | Jul 2013 — Jul 2020

- Worked across infrastructure analysis, enterprise systems, cloud initiatives, cybersecurity governance, service improvement, monitoring and operational delivery.
- Supported Azure and AWS initiatives, physical and virtual server environments, capacity planning, infrastructure documentation, business continuity and disaster recovery.
- Contributed to identity and access management, privileged access, endpoint security, vulnerability and patch management, firewall controls, MFA, SSO and security monitoring.
- Supported global enterprise security work involving Splunk, FireEye, PingOne, SIEM processes and identity federation, coordinating technical and security teams through phased delivery and troubleshooting.
- Applied ITIL incident, problem and change practices, including root-cause analysis, problem tracking, CAB coordination, SLA monitoring, status reporting and operational handover.
- Produced governance documentation and executive reporting and collaborated with architects, network engineers, system administrators, database teams and business stakeholders.

EARLIER EXPERIENCE

Assistant Manager — **HDFC Bank** | Apr 2011 — Dec 2011

- Retail banking, CRM, customer operations, compliance controls and service delivery.

Order Processing Senior Associate — **Dell** | Mar 2009 — Nov 2010

- Enterprise order-processing systems, distributed support, SQL Server, SCCM, VMware, access, incidents, problem and change processes.

Senior Customer Support Associate — **Accenture** | Oct 2007 — Feb 2009

- High-volume customer support, issue resolution, team coordination, change support and Lean Six Sigma awareness.

Consultant — Customer Support — **TTK Services** | Jan 2007 — Sep 2007

- Customer support, issue resolution, knowledge capture, service procedures and communication foundations.
